

Special Meeting
Public Restrooms
November 5, 2014

Members of the Harbor Waterfronts and Parks and Rec Advisory Committees, the Planning Board, the Tourism Board and the Town Board met collectively on Wednesday, November 5, 2014 at 11:00 AM to discuss the layout of the public restrooms and the net house at the South Avenue property.

Town Manager Miller presented an overhead drawing of the proposed floor plan of the restrooms, and also a drawing of the positioning of the buildings on the property.

The restroom building will have a deck extending from it, and will also house the mechanicals for the pumpout station. There was discussion of a ramp connecting the two buildings, which would be ADA compliant. The ramp is subject to change, as the design and layout of the buildings may determine the placement and angle of this ramp.

The exterior of the restroom would complement the existing net house's exterior, with a cupola on top, a metal roof and white hardy board siding.

The audience was then polled, and the majority ruled to leave the building layout as illustrated in the drawing provided by the Town Manager, and incorporated herein these Minutes.

There will be further meetings of this collective group to discuss details of the restroom as the plans become more concrete.

There being no further business to discuss, the meeting adjourned at 11:50 AM.

Bill Sage, Mayor

Diane H. Miller, Town Manager
