

Underground utilities run underneath town crepe myrtle trees
Trees have been in place fo a long time with an extensive root system.

Pre existing driveway is approx
16 feet wide with concrete curbs

15-16 inch existing concrete pipe

Subject: Re: Town trees and widening of driveway

Please respond to the owner. I'm currently away from the office.

Good Morning, previous owners obviously allowed those to be planted. And the Tree Board maintains those trees.

If you'd like to remove them- to widen your driveway, that is permissible, however, it is then required for them to be replaced by whomever removes them.

So, it's up to you whether to remove them or not, but you must replace them if you do.

We were made aware of that possibility when we received a line locate. None of that should be done without a permit, at which point this would have been fully explained to you.

If you have further questions, please contact the office. Thank you.

Subject: Town trees and widening of driveway

Dear Town of Oriental Administrators

I am writing to seek further clarification about removing trees (crepe myrtles) and widening my driveway on a lot that my wife and I purchased. The crepe myrtles that I did not plant, seem to sit atop various underground utilities. I need to widen the driveway so that it is more accessible for large equipment to set up a modular home that we intend to live in. I understand that a permit is needed to install additional drain pipe to widen the driveway. However, I would prefer not to be responsible for the additional cost of removing and replanting trees that the town owns, and planted along the path of underground utilities. My question is; Can the town remove the trees, and I will gladly widen the driveway and replace the crepe myrtles as part of our landscaping project.

Thank you for your consideration of this matter.

Good morning!
Permissible Use 8.110 seems to capture the intended use and calls for LUP under MU & MU1.
Seems pretty clear to me.
Best,
Pete

Subject: RE: taco truck

Good afternoon everyone.

If we're looking at restaurant vs bar, it is classified as a restaurant under our GMO: 251.172 Restaurant: An establishment, which serves food and beverages primarily to customers seated at tables or counters located within the building or designated outdoor seating areas.

It would function the same general way (I think) as the Silos, Ricks, or M&Ms in that there is seating available for customers.

Because they serve food, because they're not brewing on site, and because they fit our GMO definition, I think this would fall under a Land Use Permit rather than an SUP.

I'm happy to postpone any discussion until the January meeting, but I think this is an LUP permit (after they come back into compliance).

Can this be discussed at the January meeting? This has been a confusing establishment to me from the beginning, but I'm not necessarily opposed to the request. What will be their next request, and are there unintended consequences? Worth discussing.

Good Morning!

The Taco place on Hodges would like an alcohol permit. As I read it, they need a Land Use Permit. 8.110 is eat in and requires an LUP. 8.120 is drive in and requires an SUP. Am I reading this correctly? Of course the alcohol served would be required to be confined to the premises, but they do have sit-down service. I don't really know what drive-in means.

8.110 Eat-in, carry out or delivery service; no drive-in service

8.120 Drive-in service

Let me know your thoughts-
